

PLYMAN

GREATER SELECTION • BETTER VALUE

PRODUCT DATA SHEET

European Birch Plywood

- **Description:** Plywood Panels manufactured of natural rotary peeled decorative Birch veneers.
- **Size:** 2440 x 1220mm
- **Thickness, Construction and Typical Weights** 9mm, 5ply 17kg 12mm, 7/5ply 23kg 15mm, 7ply 28kg 18mm, 7ply 31kg
- **Colours:** White/Pale straw colour
- **Texture:** Even medium texture.
- **Source:** Russian / Chinese border where re-forestation is being developed.
- **Grade:** B/BB B grade face = clean veneer with occasional minor repairs such as small filled end splits
BB grade face = clean veneer with occasional minor repairs such as small filled splits. Core veneers = well peeled veneer allowing small internal open defects and small occasional edge core gaps.
- **Density:** 480 – 580 kg/m³
- **Gluing:** Marine Phenolic formaldehyde resin, 72 our boil test. Commonly know as WBP (weather boil proof) or "A Bond"
- **Durability:** Moderately durable. However it must be noted that exterior or marine plywood's are not required to be naturally durable and thorough sealing with preservative compounds, paints or resins is the normal trade practice and is necessary in all exterior or marine situations.
- **Uses:** Excellent substrate for decorative wood veneer or laminates for furniture and partitions.
Ideal for, shop fitting, stage sets, semi-decorative panels, exposed plywood edge units and joinery.
